

Alternative SPD location – plumbing

Sweetwater Hospital Association has received a federal grant to help with the renovation of the current Sterile Processing Department (SPD). To prevent interruptions to the surgical services, two temporary SPD locations are needed. One location will house the irrigator (instrument cleaner) and will be located on the 3rd floor. The second location will house an autoclave which will be located on the 2nd floor. Both areas will need plumbing down to the 1st floor.

The SPD project has to be completed by May 1, 2026. With the temporary location being time sensitive, the qualified vendor must be able to begin the project no later than Monday, January 5, 2026.

Any interested candidates will need to coordinate a site visit with Beverly Holley, Project Manager. Contact can be made by phone (865-213-8567) or email (beverly.holley@sweetwaterhospital.org)
